

Emdeon Self-Pay & Receivable Analysis

Fast and accurate identification of eligibles

High return-on-investment

Seamless interface with virtually any information system

Simple steps for regular eligibility checks

Most payer connections in the industry

Capture uncollected revenue

Emdeon Self-Pay & Receivable Analysis helps providers capture revenue that would otherwise be left uncollected. Utilizing our Smart Search™ technology, it automatically screens for eligibility within Self-Pay, Bad Debt and other problematic financial classes to identify coverage with Medicaid, Medicare and commercial health plans. Providers also have the option to add powerful address verification and credit reporting capabilities to Emdeon Self-Pay & Receivable Analysis to identify other possible methods of payment.

A proven investment

Emdeon Self-Pay & Receivable Analysis is a valuable companion for front-end verification systems because periodic checks can keep patient information current and accurate. Reclassification of funds and validation of patient information often results in significant reimbursements, regardless of how many records are submitted.
